

CUT TO SIZE SERVICE BLOG

Our on site cutting department, includes 4 different sized table saws, a shear, capable of cutting plastics, assorted metals, including stainless steel up to 1.2mm thick, bench drill, corner rounder with assorted tools, bevelling machine and a CO2 laser machine.

With so much equipment at their disposal, the company offer a "cut to size service" for the majority of their sheets materials.

To see which materials can be bought "cut to size" look out for the following scissor icon throughout the website's product pages:

To buy from our cut to size service, we request a minimum order quantity of 10 pieces, of any one size, thickness, and colour/product. To use this service or obtain a quote, contact our sales team enquiries@908ltd.co.uk

To assist if you do not have cutting equipment or operate machines with smaller bed / table sizes. We have now added an additional service to many of the product pages on the new look website www.908ltd.co.uk. This service gives you the option to order your material in full sheets or supplied ready cut into half or quarters. Look out for drop down box on each product page.

To obtain a quotation for your specific size or shaped engraving materials, contact us at enquiries@908ltd.co.uk
